

AIRP - Incident Response Report

Incident Type: Phishing Attack

Analyst: Dirgh Patel

Timestamp: 2026-05-03 18:11:30.451116

Status: Contained

Severity: HIGH

Evidence Collected:

- Suspicious email received by: john.doe@company.com
- Email subject: Urgent: Your account will be suspended
- Source IP flagged: 192.168.100.45
- Email headers extracted and preserved
- Malicious URLs identified and submitted to threat intel feed
- IOCs logged in Wazuh SIEM as custom detection rule

Response Actions Taken:

1. User account temporarily suspended pending investigation
2. Malicious email quarantined from mailbox
3. Source IP blocked at firewall level
4. Password reset initiated for affected user
5. All active sessions for affected user terminated
6. IOCs submitted to Wazuh SIEM for correlation
7. Affected user notified and security awareness briefing scheduled

Recommendations:

- Enable advanced email filtering for similar sender patterns
- Review and update phishing detection rules in SIEM
- Conduct team-wide phishing awareness refresh
- Add source domain to email blocklist
